

## **CHALLENGE LEVEL PROGRAM GRADES 3-5**

The purpose of a grade level program is to present a grade level subject that thoroughly prepares a student for the next grade level's program

The purpose of an advanced level program is to present a grade level subject that challenges students who are showing above average ability in a particular subject area.

### Grade level Math

Will meet and exceed CA state standards

Will proceed at the normally accepted rate for a high academic school

Will explore all concepts presented in the text

Will be graded on the production of regularly assigned work and assessments

### Advanced level Math

Will meet and exceed CA state standards

Will proceed at an accelerated pace and thus naturally cover more material than would normally be expected

Will explore concepts beyond normally accepted grade level expectations

Will challenge students with higher order learning opportunities that require students to express their knowledge in more thorough ways

### Grade level Language Arts

Will meet and exceed CA state standards

Will include Reading/Literature, Writing, and Grammar

Will require a variety of projects which allow students to use personal areas of strength to express knowledge

Will apply grammar skills in all assignments

### Advanced level Language Arts

Will exceed CA state standards

Will include Reading/Literature, Writing, and Grammar

Will challenge students in a manner that allows them to acquire and be able to express an advanced level of reading comprehension skills

Will require students to express knowledge in written format that shows a higher level of skill than would normally be expected for their grade level

Will show an advanced level of grammar application skills in all assignments

Will require students to express knowledge at an advanced level for their grade level
